

## STARGAZING EVENTS 2018

### Friday 6<sup>th</sup> & Saturday 7<sup>th</sup> April

Enjoy a last chance to see the magnificent inky black Northumberland night sky before the long days of summer arrive. We'll go in search of galaxies far, far away, keep our eyes peeled for shooting stars and show you how to take simple pictures of the night sky.

### Friday 7<sup>th</sup> & Saturday 8<sup>th</sup> September

The majestic Milky Way is our target as the dark sky season begins in earnest. We'll also enjoy wonderful views of star clusters and show you how to find a galaxy with your naked eye, as well watching out for man-made satellites scuttling over-head.

### Friday 7<sup>th</sup> & Saturday 8<sup>th</sup> December

We are be back under the fabulous Northumberland sky to spot early shooting stars from the year's best meteor shower - the spectacular Geminids. The Milky Way and ghostly nebula will also be on view during this wonderful pre-Christmas celebration of England's darkest sky.

Bed & breakfast **£60** per person per night based on two people sharing a twin or double room.

Single occupancy **£80** per room, per night.

**All presentations and stargazing included.**

All weekends include colourful talks for novices and stargazing with our resident astronomer Richard Darn.  
Equipment is provided.
